03 History

Swami Dayanand Saraswati and Rajaram mohan Roy inspired Indians for education in Indian society, later Swami Vivekananda and Pandit Madan Mohan Malaviya and Sir Syed Ahmed Khan emphasized on education among Muslims. These great leaders had an impact on the Somany family of Khol village, That's why a young man from here, Seth Vishambhar Lal, in village Bagad, district Jhunjhunu (Rajasthan) in the year 1911 established B.L. High School. This school was inaugurated by the Maharaja of Jaipur. It can be understood from this one example that the Somany family has been popular among the common people from the royal families of Haryana, Rajasthan and Delhi.

Mr. R.D. Somany was fast friend of Rao Mahavir Singh, Transport Minister of Haryana Government. Rao Mahavir Singh was the son of Punjab Government Minister Rao Mohar Singh. With the help of Rao Mahavir Singh, the people of Jatoli, Heli Mandi and Pataudi had built Kamla Nehru College in Jatoli, Heli Mandi in 1971. Mr. R.D. Somany was also interested in building a college near Kund station, but due to the nearing of his end time, his ambitions were shattered. In the absence of a leader like R.D. Somany, Bawal and Kund lagged behind. Nothing happened in Kund (District Rewari) after 1970. It is notable that Kund Senior Secondary School and Khol Senior Secondary School were among the oldest schools. In the absence of a good and hardworking leader, there is nothing in the kund today, now to fulfill R.D. Somany wishes, his sons Mr. Ashok Somany and Vijay Somany have opened the first engineering college in Rewari, now classes upto MTech and MBA have started in this college. Vijay Somany ji says that this area has lagged behind due to weak leadership. There was a time when Rewari was equal to Ambala in terms of education, now this area is far behind Ambala, still the efforts of R.D. Somany's sons have been very good for the region.

The Somany family built another school in Khol village, the name of this school was B.L. Senior Secondary School . Mr. R.D. Somany opened a school in village Khol (District Rewari) with the help of his uncle Vishambhar Lal. Thus we see that Mr. R.D. Somany did a lot of service in the field of education of the country and society by opening two high schools before independence and now in Rewari district, his sons Mr. Ashok Somany and Dr. Vijay Somany, to fulfill the dreams of R.D. Somany, high quality schools and colleges are being opened, in which Somany Vidyapeeth located in Rewari area is noteworthy. Now both Technical & Management classes are held upto post graduation level in Somany Engineering College. This is the only engineering college in district Rewari. In this way Not only R.D. Somany worked in the field of education, but also his son is putting his body, mind and money for education.

03 Pharmacy

Somany College of Pharmacy is established under aegis of **Swatantra Senani R.D Somany. Somany Sansthan** which has started this **SCP** a prestigious Institute with the objective of starting or rendering quality education in the field of Pharmacy also and thus produce, Pharmacists useful to the society is a commitment under taken by the college

PROFESSION OF PHARMACY

The profession of pharmacy is the most trusted one. The development of the profession in India dates back to 1930's when the Independent Government of India appointed a committee to look up drugs in our country. the lack of Qualified Pharmacist and testing laboratories were the reasons why quality drugs were not available in India.

With the framing of Pharmacy Act 1948 and The Drugs and Cosmetics Act 1940 by Government situation started improving. Now a days with availability of more than thousand drug combinations in India, it is difficult to find whether a drug is spurious or duplicate or adulterated. hence only a pharmacist can take up the challenge of providing better health care.

Pharmacist are technologists in the manufacture and quality control of dugs. It is worth mentioning that a pharmacist is an experts on drugs whether it is manufacture or analysis or evaluating the prescriptions.

With the upcoming years several opportunities are awaiting for the successful students studying in various courses of pharmacy.

03 Who Are Engineers Anyway?

"Engineers are people who want to make things better, faster, stronger, simpler, smarter, quicker, quieter, greener and more efficient," shares Julie Ulseth, director of marketing, enrollment services at Kettering University (MI). Job security? Engineering has it! "Engineers are some of the most sought-after professionals in our society today because they imagine the future and make it happen," explains Matt McLendon, director of communications at Georgia Tech. "There are plenty of opportunities for a career that can be personally rewarding and can make a major contribution to the improvement of people's lives and the advancement of our nation," says E. Manos Maragakis, dean of the College of Engineering at the University of Nevada, Reno. "Examples of contributions include engineering applications related to all aspects of infrastructure, national security, renewable energy, natural disaster response and medical applications." With engineering you've got plenty of options!

"It's not all work and no play." There is always something new because technology opens doors and minds every second of every day. There are fields of study and new industries that don't even exist yet that will come into being because of engineers .But as exciting as the field of engineering can be, it isn't the right fit for every student. Engineers undergo rigorous training to prepare for the demands of this fast-paced career
